EDUCATION

University of Pennsylvania — M.S.E., Electrical Engineering Expected May 2027 · GPA 3.72

Coursework: Machine Learning (CIS 5200), Graph Neural Networks, Statistics for Data Science

Jilin University — B.S., Physics (Theoretical Physics Track)

Jul 2024 · GPA 3.80

Competition mathematics & physics training

RESEARCH

Athena: Attribution-Driven Skill Learning for Small LMs

Designer & Lead · 2026–present

In collaboration with an industry research group; technical report available on request

- Designed and built a full pipeline training a 4B model (Qwen3.5) to diagnose its own failures, produce reusable skill entries, and consume them at inference — with the diagnostic capability itself trained into weights via SFT + RL rather than delegated to a frontier API
- Attribution shown trainable and surgically improvable: parse rate 34.7%→99.7%, false-production 48.3%→0%, teacher-inherited misdiagnoses eliminated (6→0)
- Built zero-annotation verification: attribution correctness graded by the base model's actual post-update behavior (87.8% prediction accuracy), no human labels
- Discovered skill value is not intrinsic — Δ depends on retrieval-competition regime and problem set (same skill: $+0.06 \rightarrow -0.24$ across regimes); full experimental discipline with pre-registered criteria, provenance tracking, and contamination auditing

GRPO-TCR Reproduction (RL for LLM Reasoning)

Independent, self-funded · 2026

- Independently reproduced agentic RL training on rented $8 \times A100$ infrastructure (verl, FSDP2): Qwen3-4B + GRPO with token-level loss, clip-higher, overlong reward shaping; AIME 2024 Avg@32 +14.1pt over 30 steps

Nonlinear Chirp Mode Estimation — UPenn

2025–present

- Two-stage MATLAB pipeline (ridge extraction + ADMM joint refinement) for multi-mode reconstruction under mode crossings and large dynamic range

Research Intern — CV / Model Deployment, UCAS Beijing

Jul 2024 – Jan 2025

- Benchmarked VGG, YOLO, CLIP, BLIP2; built evaluation workflows for deployment-oriented testing

SKILLS

PyTorch · vLLM · LoRA fine-tuning · GRPO/RLVR training (verl) · HuggingFace · Git · Python · MATLAB

HONORS

Provincial First Prize, Chinese Physics Olympiad · Yan Jici Scholarship (IOCAS, 2021) · GRE 325 (Q170)
